# Benefits of Gooseneck Horse Trailers From Double D Trailers

#### There's nothing like a rejuvenating nap halfway through a long day of showing...

Our gooseneck horse trailers combine the convenience of mobile sleeping quarters with top horse safety features. You'll get the ultimate package!

Double D's gooseneck horse trailers for sale are not only structurally sound and designed for your horses' safety, they are also sold at a factory direct value price.

#### - Is a Gooseneck Horse Trailer Right for You? —

- **Do you want a horse trailer sleeping quarters?** Spending hours or days at a horseshow can be exhausting. One of the top advantages of a gooseneck trailer is the useful space that overhangs your truck bed. This 'gooseneck' space is the perfect place to take a power nap or spend the entire night to avoid the expense of a hotel. During camping trips, you can ditch the tent and stay close to your horses throughout the night.
- How many horses will you haul? Determining how many horses you need to haul in your new trailer is vital information. If you only need to trailer one or two, then a bumper pull horse trailer may be a good fit for you behind an adequately equipped tow vehicle. If more horses make you merrier, then explore our gooseneck options.
- What are your tow vehicle capabilities? If you are planning to use your current tow vehicle, you'll need to determine how much weight it can safely haul. Ideally you would want to purchase the trailer first and purchase a new tow vehicle afterwards to safely handle the load. However, this is not always possible. If you are restricted to your current vehicle, then make sure it is able to handle a gooseneck trailer's higher tow rating requirements.
- **NOTE:** Under no circumstances should you exceed the manufacturer's rated tow capacity of your vehicle. If you are confused or unsure, ask a specialist at Double D Trailers for help.

### Advantages of Gooseneck Horse Trailers at Double D

## Want to know what sets us apart from the competition? Check it out!

Safest Rear Tack in the Industry: It's no wonder many horses give their owners a "fit" loading on traditional slant load horse trailers. These trailers usually have a stationary tack storage area blocking half of the trailer's entry way. This leaves a narrow and scary entryway for both horse and handler to use. Even if your horse is brave enough to enter, the confined space can be extremely dangerous if something unexpected happens. With our SafeTack design, the enclosed tack storage area can swing out like a second door leaving a wide open loading zone. It makes the horses happier - which makes the humans happier.

V-Style Aerodynamic Gooseneck: This design provides a greater turning radius behind your tow vehicle and increased gas mileage. Never purchase a gooseneck trailer that has a flat front as you may run the risk of damage to your truck in tight turning situations. Returning home with the back glass of your truck shattered can put a damper on what should have been a fun trip.

**Gooseneck Clearance:** Have you ever seen a Gooseneck Horse Trailer being towed with the front end jacked up? Yikes! Not only will your friends talk about you behind your back, but it can cause uneven tire wear and a bumpy ride for you and your horses. At Double D Trailers, we insure you have adequate clearance over the tailgate of your truck so the trailer will tow level. Plus, this will help avoid crushing your truck's side panel on uneven terrain.

**Custom Designed Trailers:** Each of our horse trailers is made-to-order. You can customize the design to fit your specific horses, add special features, or remove items that you won't need. These customizations include things like increased head room over the sleeping area or your choice of exterior graphics and colors. Make the trailer one of a kind to match you and your horses' personalities.

Nationwide Flat Rate Delivery: Don't worry if you don't live close to our manufacturing facilities. We won't make you drive cross country to pick up your finished trailer. We have flat rate delivery anywhere in the country. Plus, we can arrange for delivery if you live in Canada or Australia.

**Top Safety Features:** The SafeTack design is just one of our many innovative safety features. We put you and your horses' safety above everything else. Check out information on features like Z-Frame, Rumber flooring, SafeKick, SafeBump, and how we create a 'horsefriendly' environment inside the trailer.

**Factory Direct Pricing:** Get more 'bang for your buck' with our custom made horse trailers. Buying a horse trailer online is easy.

**Expert Advice:** Do you have questions about buying a horse trailer or choosing the best materials? Do you need help determining the hauling capacity of your tow vehicle and hitch? Just ask us! We're glad to help.

## Get the Most Out of Your Gooseneck Horse Trailer

The sleeping quarters at the front of your gooseneck trailer will become a shaded retreat on those long and hot days at the show. Stock your area with cool beverages, a comfy mattress and supplies to get you through your day.

As with the rest of your new trailer, this private dressing room is completely customizable. Many choose to add increased head room over the gooseneck sleeping area. You can also add custom clothing hooks, storage compartments, or wall grid organizer panels to keep your equipment organized and clean.

If camping is your thing, you will love using the gooseneck area as a home away from home. You can leave the leaky tent at home and use the sleeping quarters for overnight trips. An interior access door back to the horse area will allow you to easily check on your horses.

Stay cool with an overhead powered roof vent that will create a pleasant breeze. Add an extendable awning to the side of your trailer to create a shaded area to enjoy the day.

#### Details that Make a Difference: How We Raise the Bar for Horse Trailers

Oftentimes, it's the 'little' things that make the biggest difference. From hitch to bumper, we've looked at every detail to make it safe, easy to use, and durable. Here are just a few of those little details that help us create a higher standard for horse trailers.

- Z-Frame Technology Brittle aluminum horse trailers are not strong enough to withstand the force of an accident. They crumple like an old soda can. Our patented Z-Frame design uses a special zinc alloy to provide superior strength in a lightweight design. The walls of your new trailer are made of rivet-free 16-guage galvanite that is 5 times stronger than 0.04 weight aluminum. Overall, you'll get a lightweight trailer that is stronger than aluminum and provides the same durability.
- **Easy Window Latches** We've moved the latching mechanism on the trailer windows to a lower position so they can be more easily reached.
- **Self-Watering Tank** Add a self-watering tank system to your trailer so your horses can stay hydrated throughout the trip.
- **On-Board Cameras** Do you want to keep an eye on your horses during the trip? Add an on-board camera so you can watch them while you travel.
- **No Rattle Partitions** We've secured all loose components inside the trailer to cut down on noise and stress for the horses.
- **Horse Friendly Interior** No horse likes a hot and dark trailer. That's why we've painted the interior of the trailer white to reduce reflected heat. We maximized air flow with large windows and tubular head dividers. A fully insulated trailer and ceiling help control the temperature to prevent excess sweating and dehydration.
- **Tail Lights** The trailer's rear tail lights have been moved to a higher position for maximum visibility for following traffic.
- **Easy Lift Ramps** You won't strain your back lifting our springassisted ramps.

And so much more...

#### Words from Our Customers...

So Karen Jones of Newnan, Georgia had this to say about her new SafeTack 2 horse slant gooseneck horse trailer:

I love my new Double D Trailer. First and foremost, I have never experienced personalized customer service of this caliber ....ever, for any product I have purchased. Brad made it so easy and a lot of fun to 'design' my trailer. He worked with me on my own ideas and gave his opinion on what would work and what wouldn't...what would look good and what wouldn't!! Brad arranged for my new trailer

I have never experienced personalized customer service of this caliber ever - for any product I have purchased.

to be delivered from the factory in Wisconsin to my home in Georgia. The quality of the workmanship on the trailer is outstanding. I got their own patent pending reverse/forward facing SafeTack 2H Slant Gooseneck. Brad designed a hay/feed room for it and I enlarged the dressing room. I can't wait to haul my horses in it, it is so much roomier than either of my previous 3 trailers! I have one problem loader that loves being able to walk forward in and OUT! I highly recommend Brad and Double D for a great trailer designing experience, extraordinary customer service and a fabulous product!

So Terry and Nancy Jennings of Dunlap, TN were also relieved that their 'problem loader' was happier in their new 2 horse gooseneck horse trailer:

Our "problem loader" walked onto the trailer the first time and every time since. I think the step up for him makes him commit to getting on, but the openness of the trailer is really what convinces him it's safe to load. A lot of our friends have stopped by to see the trailer and they've all been impressed with the design features and fit/finish. We trailered home 13 hours and it pulled beautifully no issues, much easier to pull. I love the "Rumber" flooring, no slipping and much easier to clean out. The Safe Tack in the rear of the trailer is by far the best on the market. Easier to load your tack and tack up your horses when you

arrive at your riding destination. We compared the Double D trailers to everything else on the market and there is no comparison in our opinion. We love our new trailer and look forward to many great adventures with our horses.

Janet Wallace of Elbert, Colorado loves the flexibility of two loading options when camping with her 3 horse gooseneck reverse slant load:

I love this trailer. The horses are very comfortable in it. The variable load/unload options are extremely handy. Many trailheads I trailer to have non trailer friendly parking lots. Being able to load from the side or back and unload either way makes it very safe. I know I will enjoy this trailer for many years to come. Thank You Brad and everyone at Double D.

#### How to Get Started: Ordering Your Gooseneck Horse Trailer

All of our Gooseneck Horse Trailers come with a standard set of unique features. Our customers – and their horses – appreciate that we put so much emphasis on safety and comfort. With our gooseneck horse trailers for sale, you'll be able to find the right model to safely and comfortably transport your horses and yourself.

#### Here's how to get started...

Step 1: Submit an Online Customization Request – Use the drop down menus on the website to check out all of our gooseneck horse trailer models. Click 'View and Customize' on a particular model to learn more about its features. Then, click 'Customize Your Trailer' to begin building your own personal design. It's easy to select features on your wish list and few the estimated cost to stay within a budget. Submit the order with a few details about yourself and you're on your way to a brand new trailer!

- **Step 2:** Our design team will get back to you with a **Detailed Pricing Estimate** to identify any potential problems with your submission.
- Step 3: At this point, you will begin a
  Detailed Back-and-Forth Conversation
  with our experts to refine the design
  and establish final pricing. We can also
  discuss your truck's towing capacity to
  make sure you can safely haul the trailer.

**Step 4:** Next, you will receive a detailed **CAD Drawing** that will act as the blueprint for the trailer construction team.

Step 5: If everything looks good, you can give your Final Approval and Construction Can Begin. The

trailer is now officially on order.

**Step 6:** All of the **Final Touches** can be discussed after the trailer construction has started. This includes things like selecting final color choices and finishes that make your trailer one of a kind.

One of the most exciting times for buyers is being connected with their delivery man. He will drive your trailer right to your home for a flat rate delivery fee. You get to give your final 'thumbs up' before the delivery man leaves.

Then it's time to load up the horses and start having fun!
