How We Raise the Bar for Horse Trailers: Top Horse Safety Features

From hitch to bumper, we've looked at every detail on your trailer to make it safe, easy-to-use, and durable.

Here are just a few of those features that help us create a higher standard.

SafeTack® Design (patented)

Eliminates the dangerous narrow doorway found on conventional slant load trailers. Instead, a lockable tack area swings out like a second door, allowing an extra wide loading area.

SafeKick® Walls and SafeBump® Ceiling

Flexible and durable composite materials on the walls and ceiling protect your horse from injury.

Patented Z-Frame®

Lightweight Construction

Superior strength over aluminum protects your horses in case of an accident. Our 16-gauge Galvalite skin is 5 times stronger than 0.040 aluminum for an overall lightweight trailer.

Rumber Flooring

Aluminum floors corrode and weaken with time. Rumber provides lasting durability and easy cleaning. Plus, it reduces noise and vibration to lower stress levels and minimize leg fatigue.
